THE AGENTIC ENTERPRISE

From Copilots to Digital Colleagues

Preparing for a workforce of humans and agents.

The Prompting was only the beginning.

WORKSCAPE CIRCLE 2026

Usman Afzal

Solution Architect at Microsoft
AI advisor and international speaker

WE'VE ALREADY ENTERED A NEW ERA

Intelligence is moving **closer to actions.**

1950s
Mainframes

1980s
Personal computers

The operating model is **moving**.

Delegation to Agents

Assign outcomes and execute work

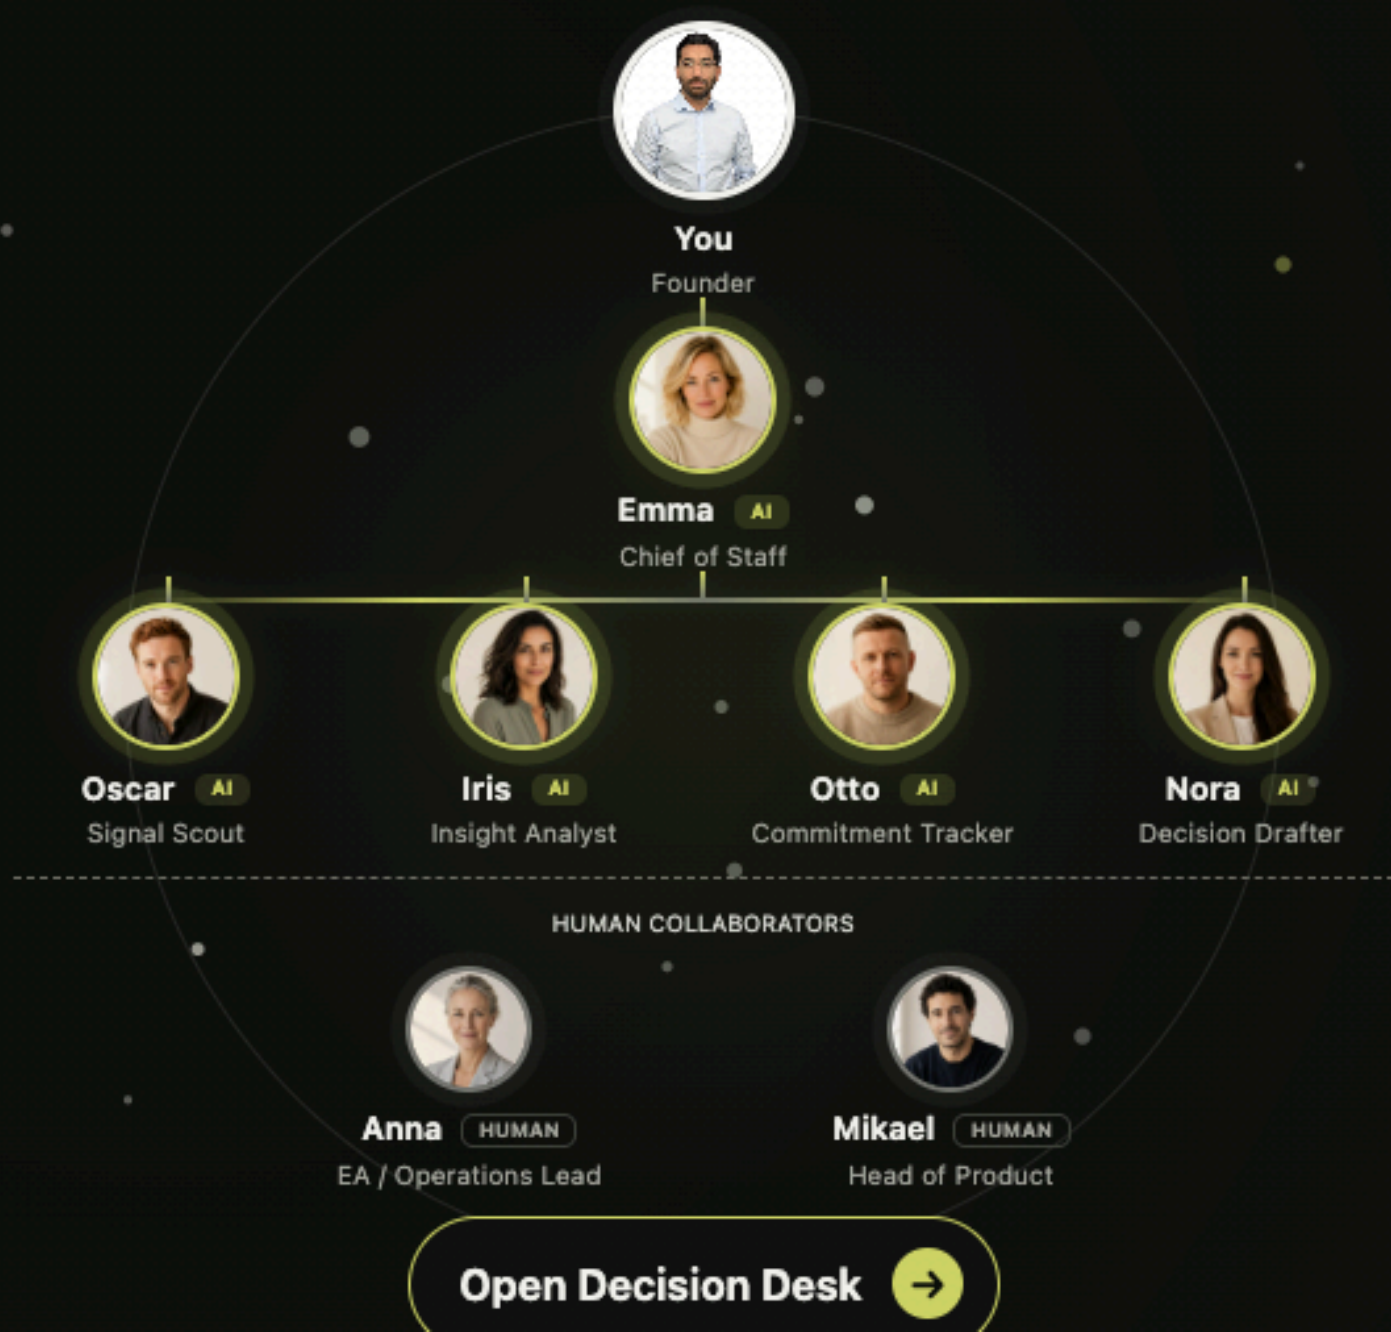

Copilot Cowork

03

THE NEW ORGANIZATIONAL CHART

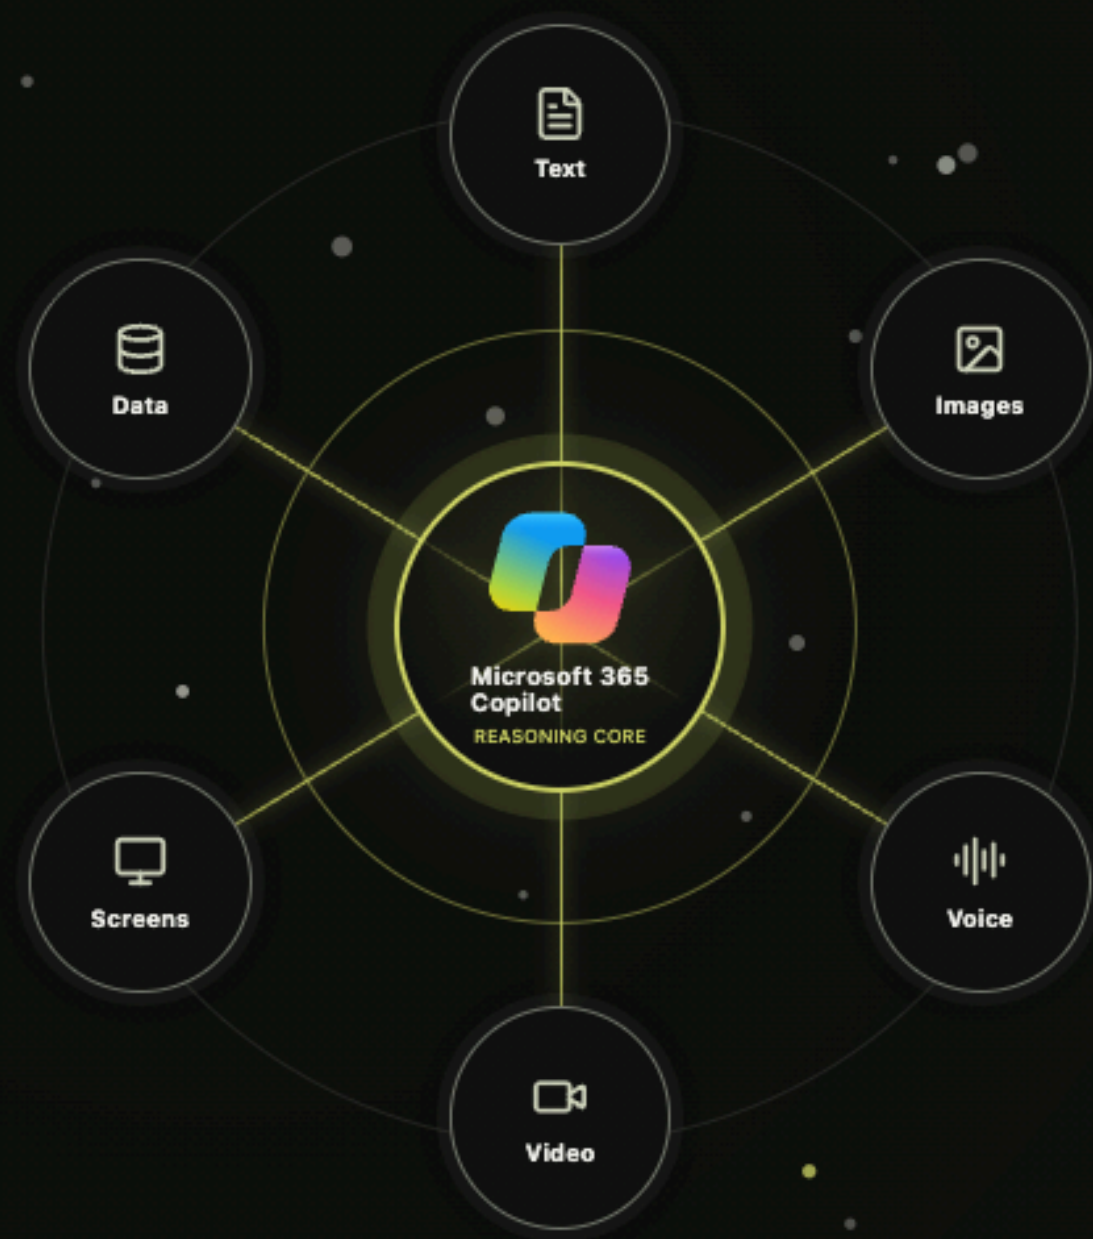

Humans alongside digital colleagues.

A governed team of people
and specialized AI roles.

MULTIMODAL INTELLIGENCE

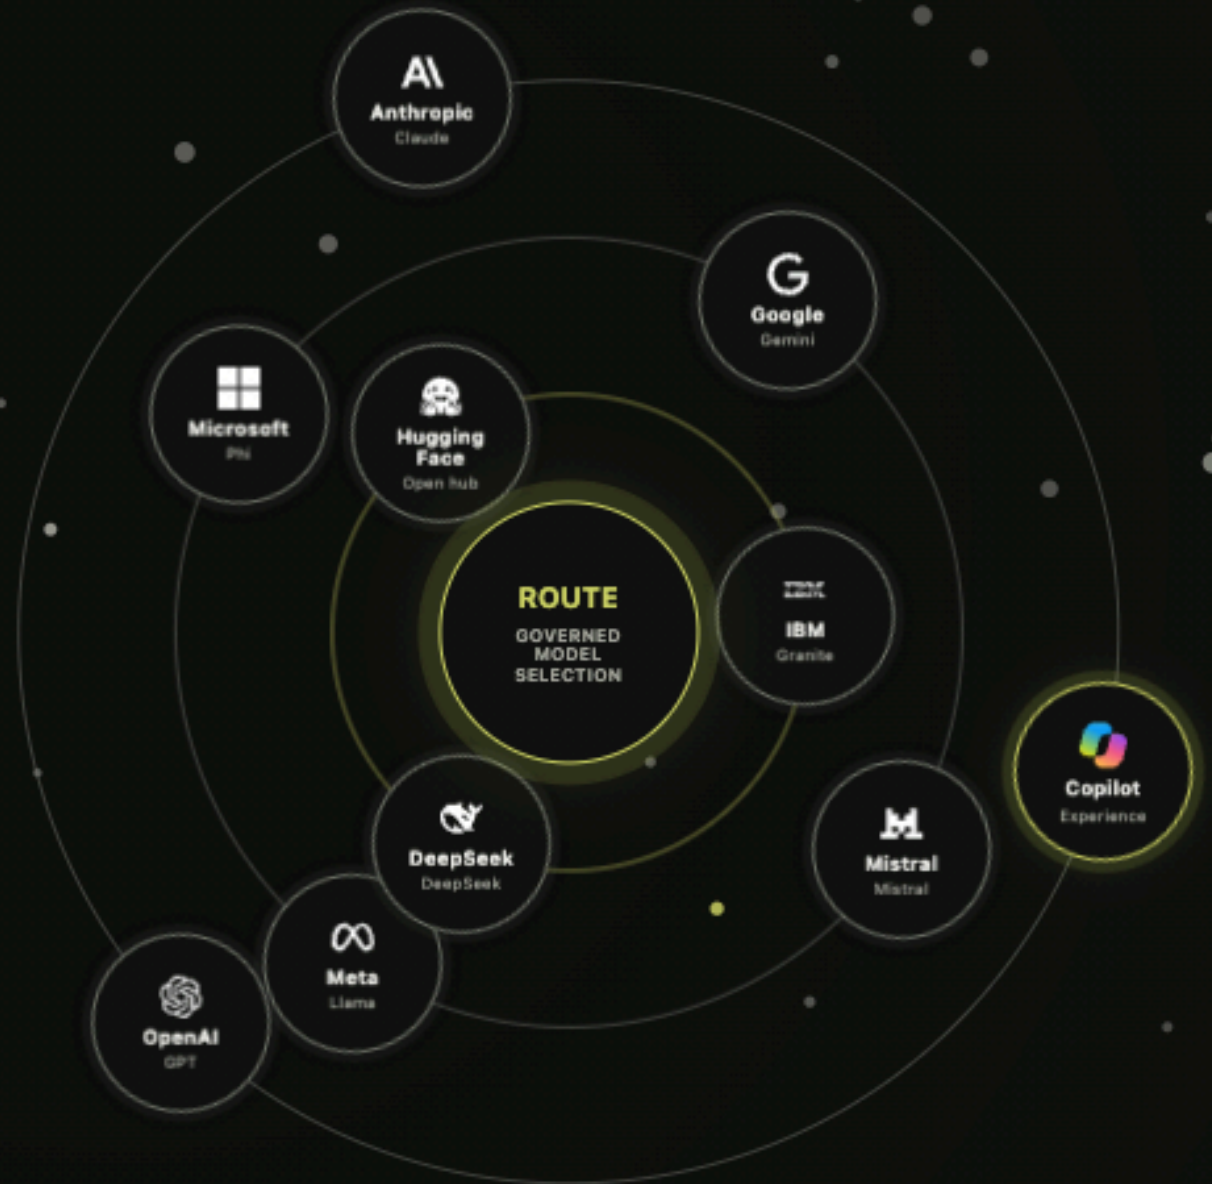

**AI can
now see,
hear,
reason
and act.**

MULTI-MODEL ENTERPRISE

There will not be **one** **model.**

Organizations will govern
portfolios of intelligence, not
select a single winner.

FROM SELECTION TO ORCHESTRATION

Model choice becomes a **system decision**.

Human chooses

One task. One model.
Manual judgment.

Platform routes

Cost, capability, policy and
context.

Models collaborate

Specialized intelligence
works as a system.

INTELLIGENCE + TRUST

A GOVERNED PATH FROM DATA TO EXPERIENCE

Microsoft AI Approach with Copilot.

PLATFORM STRATEGY

Microsoft AI Approach with Copilot.

1

Multi-Model

Future-proof your platform

- Anthropic, OpenAI and more to come
- Adapt as the industry evolves
- Never re-platform when markets shift

2

Multi-Harness

Orchestration and real work

- Planning, tools, agents and memory
- Turn intelligence into execution
- Run real-world AI workflows

3

World's Best Platform

Rapid innovation at scale

- Absorbs change and cost
- Quick, secure, enterprise ready
- Always first with the best AI

4

Cloud-native, enterprise-grade and secure AI built for work

Grounded in your organization

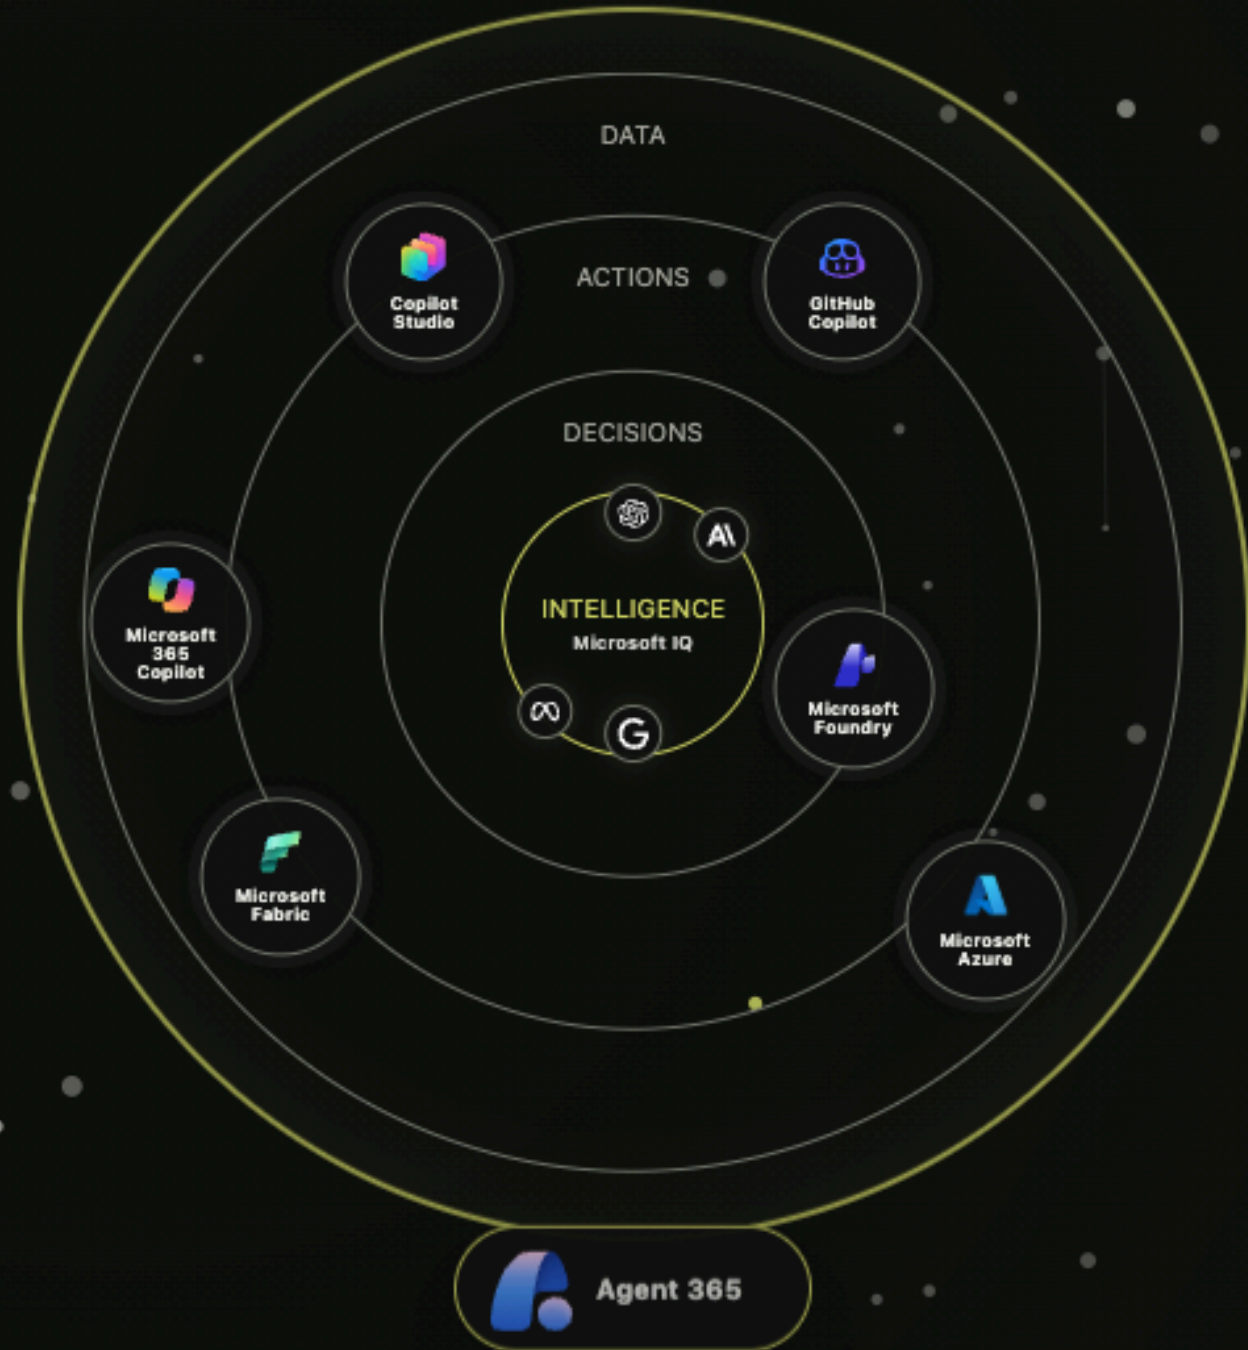

- Copilot is grounded in your intelligence with WorkIQ
- Natively integrated in the flow of work
- Your data stays protected with enterprise security and governance

"It's not about the model. It's about a platform that can outlive every model."

GOVERNANCE AS CAPABILITY

**Govern what
AI sees, does,
decides and
uses.**

LEADERSHIP DISCUSSION

Five questions for the agentic era.

- 01 Which work should be delegated to agents?
- 02 Which decisions must remain human?
- 03 How should model choice be governed?
- 04 How will AI consumption be funded and managed?
- 05 What does your future organizational chart look like?

A QUESTION FOR THE ROOM

If every employee in your organization had access to one or more AI agents next year,

what would be your **biggest challenge?**

Choose the one that would slow adoption first.
